

Orchestrating a brighter world

NEC

NEC MEETING CENTER

SMART APPLICATION SUITE
FOR ALL SMALL, MEDIUM &
LARGE ENTERPRISES

REAL-TIME SHARING & EXCHANGE OF INFORMATION

With technology changing exponentially and workforces becoming more mobile, having the right collaboration and conferencing tools can make a huge difference in your team's ability to maintain high levels of customer service – no matter their location.

A SMART APPROACH

EFFICIENCY AND GREATER PRODUCTIVITY

NEC Meeting Center (NMC) provides a 'suite of applications' which includes, sophisticated audio conferencing, web collaboration, predefined dial-out conferencing and mass notification for all of NEC's communications platforms. This comprehensive suite equips your employees with the tools they need to help them improve efficiency, lower spending by reducing the need for travel and stay informed. As a result, your employees become more responsive and productive through real-time sharing of information and most importantly, service your customers better.

- > **Improves teamwork** among colleagues in geographically dispersed locations
- > **Enables real-time sharing** and exchange of information between co-workers and customers
- > **Reduces travel costs** through enhanced collaboration tools
- > **Increases employee efficiency** and productivity
- > **Eliminates monthly recurring charges** for hosted solutions
- > **Supported on** NEC's UNIVERGE® 3C™, UNIVERGE® SV9100, UNIVERGE® SV9300 and UNIVERGE® SV9500 communications platforms
- > Operates across **premises, cloud or hybrid environments**

COMPREHENSIVE, SECURE COLLABORATION SOLUTION

IMPROVING THE EMPLOYEE AND CUSTOMER EXPERIENCE

NEC Meeting Center (NMC) is a secure, premises-based solution that encourages collaboration, helps lower expenses and enables the ability to send mass notifications or predefined dial-out conferencing.

By implementing a premises-based solution, you immediately eliminate your recurring expenditures for a hosted solution. Besides saving you money, NMC provides you with the peace of mind that your communications with your employees and customers occurs on your own secure network.

NEC Meeting Center:

- > **Provides Meet-Me (both PIN-based or PIN-less) audio conferencing, Dial-Out Firebar conferencing, web and video collaboration, and mass notification** all in one comprehensive solution
- > **Alleviates the need and expense of deploying multiple unique applications** from multiple vendors
- > **Offers secure connections** with individuals in geographically diverse locations for employees to conduct presentations, meetings and training
- > **Enables collaboration** with colleagues and customers for real-time sharing of information
- > **Provides mass notification capabilities** in the event of emergency situations or other types of events via voice, email, and Short Message Service (SMS), text message to NEC IP phones or a combination of all four to individuals or groups

SECURE COMMUNICATIONS

SINGLE APPLICATION OFFERS SECURE CONNECTIONS FOR MOST ANY SITUATION OR NEED THAT ARISES

STAYING CONNECTED HAS NEVER BEEN EASIER

With NEC Meeting Center's rich set of audio conferencing capabilities, staying connected from any location has never been easier. It allows your employees to set up and manage secure conference calls via their PC or through the NMC 'Real View' web portal on their mobile device.

ELEVATE THE EMPLOYEE EXPERIENCE

YOUR EMPLOYEES ARE YOUR MOST VALUABLE ASSET

By providing your employees with tools that simplify setting up and hosting conference calls with customers and colleagues, it helps to make them more efficient and productive along with enhancing their work environment.

- > Supports both **reservation-less and reservation-based** audio conferences
- > **Enable secure conference access** (requires conference access code and a personal PIN)

AUDIO CONFERENCING DONE RIGHT

FLEXIBLE, CUSTOMIZABLE AND SECURE COMMUNICATIONS

- > **Customize each audio conference room per your requirements**, e.g., select entry tones, select memorable vanity PINs, turn recording on/off, select auto-call back on/off, select enter audio conference muted on/off etc...
- > **Schedule recurring audio conferences via the Web Portal** - use Microsoft® Office Outlook® iCalendar application to send invitations to desired participants
- > **See real-time view of a running audio conference** via NMC's "Real View" Web Portal - participants can be seen by name or by caller ID, recording can be managed, participants can be muted or dropped from conference and more...
- > **Display loudest speaker** - allows the identification and muting of a participant who may be inadvertently injecting noise into the audio conference
- > **Exercise multiple in-conference controls** via phone key presses or the Web portal
- > **Auto mute** noisy lines or lines with excessive echo
- > **Merge two or more audio conferences** into one without dropping any calls - transfer participants between conferences
- > **Send a detailed end-of-conference summary report** to the moderator after a given audio conference is over
- > **Record entire conference** or excerpts from a conference and playback via PC's media player or via dial-in IVR or send via the summary email mentioned above

REACH SELECT GROUPS OF PEOPLE QUICKLY

Whether you need to reach a group of first responders quickly during an emergency or have a weekly scheduled call with a group of your colleagues, NEC Meeting Center's Dial-Out (Firebar) conferencing can meet your requirements.

CONNECTS PEOPLE SEAMLESSLY SIMPLY ANSWER THE PHONE

NMC Dial-Out (Firebar) Conferencing allows the server to call a pre-determined group of people and upon off-hook place them into an audio conference. Once a conference is in progress, various DTMF controls available on NMC Audio Conference can be exercised. NMC Dial-out conferencing provides flexibility to reach a group of people via voice, email, and SMS text and if necessary pull them into an impromptu audio conference.

- > Trigger a dial-out conference based on either an incoming phone call, a click on a web portal or a scheduled time
- > Select communications medium to be used for message delivery [Voice only, Email only, SMS (via SMTP) only or any combination etc.]
- > Send calls to any PBX extensions or to PSTN landline or cellular numbers
- > Supports an unlimited number of call out groups
- > Send caller-ID of your choice that can be used by recipient's cell phone to display associated 'caller name' (e.g., Central Security)
- > Allow recurring dial-out calls
- > Offers answering machine detection and avoidance
- > Provides summary and detailed reports on call completions (Busy, No Answer, Answering machine etc.)

RECURRING 'FIND ME' CONFERENCE CALL

AUTOMATICALLY 'DIALS-OUT' TO CONFERENCE GROUP

For regularly recurring meetings with a specific group or team, Dial-Out (Firebar) Conferencing makes it easy for everyone to connect and join the call. No need to search for the dial-in and/or PIN number, NMC automatically dials and connects everyone at the pre-determined time.

- > **NMC triggers a dial-out to designated group of people** and upon off-hook, places them into a conference
- > **'Find Me' capabilities will call all available numbers** for an individual until they answer – no need to sit by a particular phone to join
- > Alleviates the need to **continually schedule the meeting**

INSTANTANEOUS 'FIND ME' CONFERENCE CALL

GREAT FOR CONFERENCING FIRST RESPONDERS

In the event of an emergency, quick communications between first responders is critical. NMC's Dial-Out (Firebar) Conferencing enables you to trigger a conference call simply and easily. Through pre-configured NMC service selection rules, dial-out conferences can be initiated based upon incoming Caller ID or called number. It can also be triggered via the web portal.

- > **Initiate a conference call with a single press** of a pre-programmed speed-dial key
- > **'Find Me' capabilities** ensure that necessary personnel are reached and join the call
- > **Answering machine detection** and avoidance saves times in reaching people
- > **Recording options** are available for later playback

ELEVATE CUSTOMER AND EMPLOYEE EXPERIENCE

Ensuring that your employees have the right tools to collaborate with each other as well as customers, enhances their overall work environment. It makes it easier for them to communicate, and share ideas and information with colleagues and customers.

When you take communications a step further by adding video and whiteboarding capabilities along with other features, it adds a whole new visual element for both employee and customer – enhancing their overall experience.

SMART COLLABORATION

REAL-TIME SHARING OF INFORMATION

By combining NMC Web Collaboration with NMC Audio Conferencing or using WebRTC PC Audio, you can further enhance the collaboration capabilities of your employees. When used together, participants can collaborate in real-time and achieve desired end results quickly without exchanging multiple emails.

- > Can be used standalone or in conjunction with NMC's Audio Conferencing application
- > Web-based application - no software download required and no recurring costs that are usually associated with hosted solutions
- > Designed to run across the Internet or a private data network without requiring any changes to firewalls - running behind a secure private data network insures that your web conference content cannot be compromised

- > Review projects, schematics, diagrams and presentations with customers and colleagues
- > Upload images to Whiteboard for annotation by attendees - save annotated image to local PC after meeting
- > Perform public chat to all participants or private chat – ability to upload documents or files to the Chat so other participants can download
- > Record entire meeting and download to MP4 file that can be easily distributed
- > NMC Web Collaboration is totally based on latest technologies, HTML5 and WebRTC

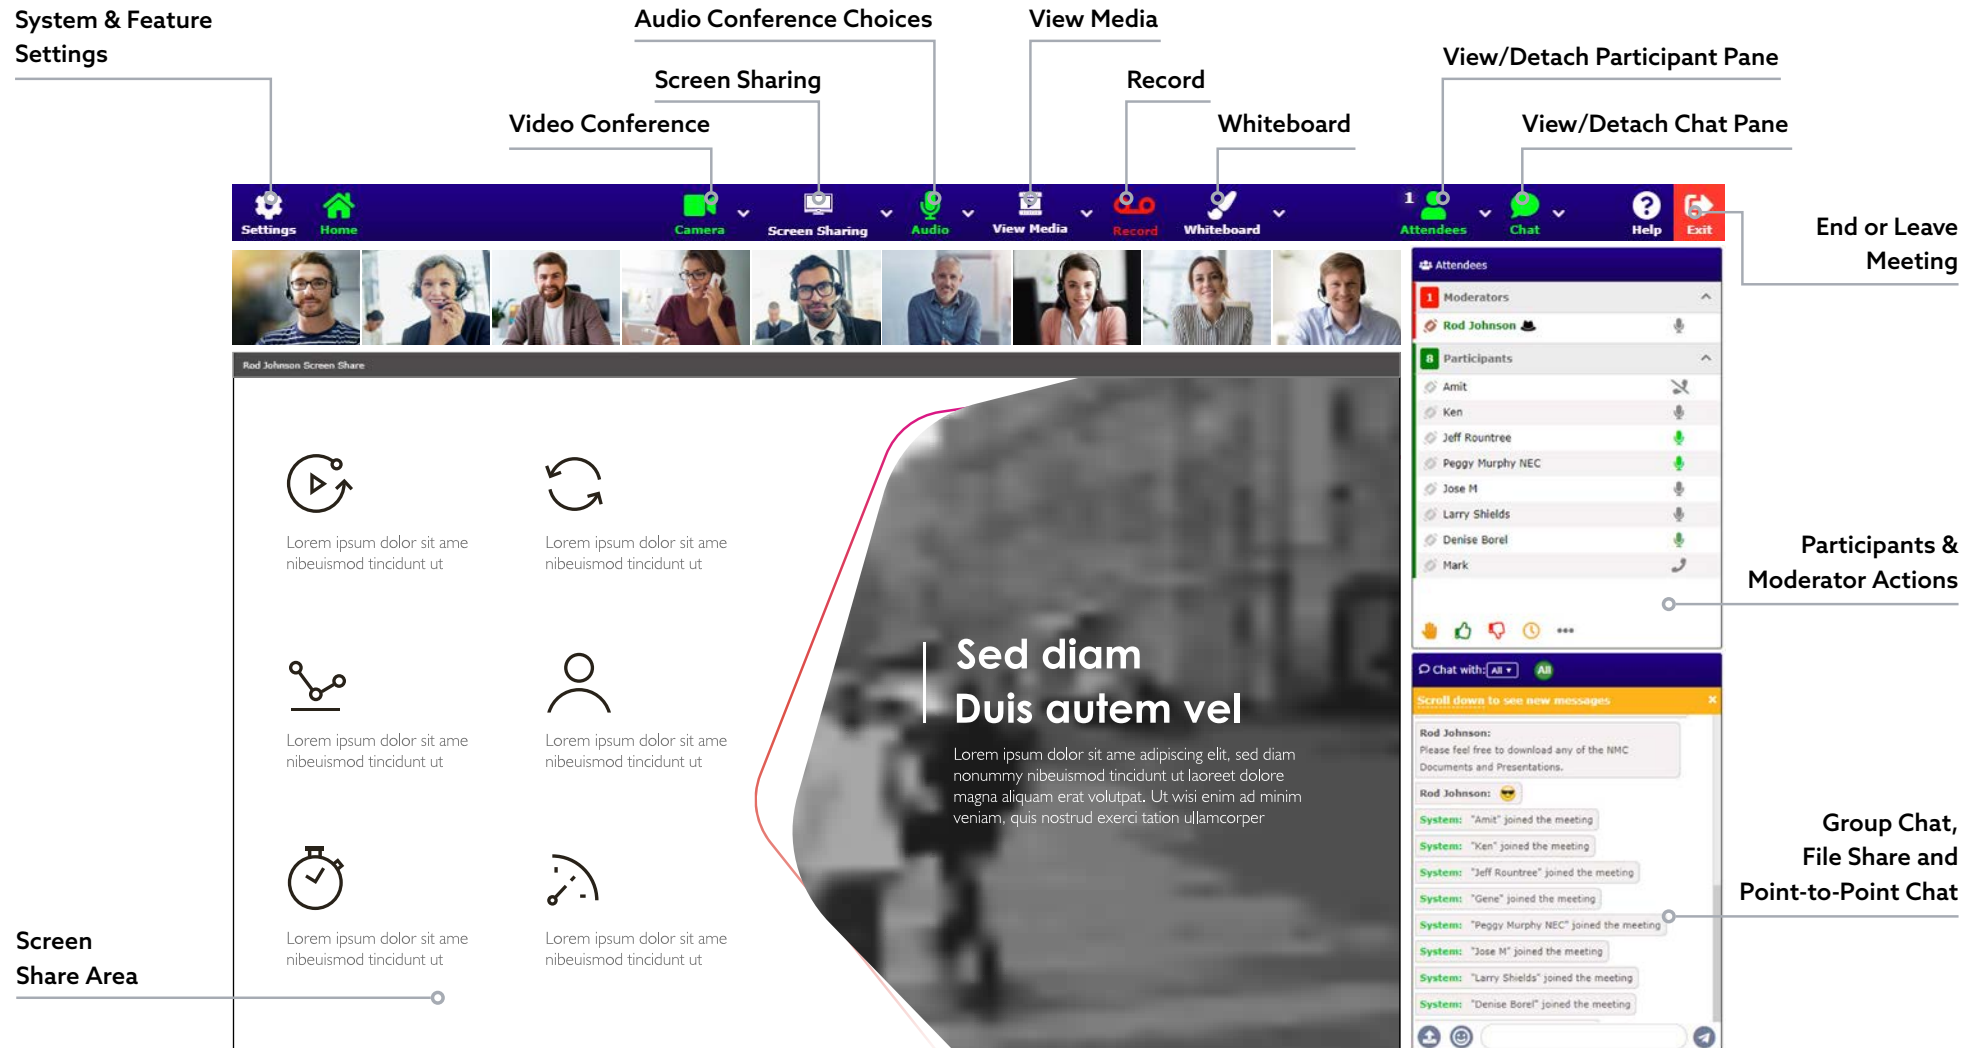

Invite Others to the Meeting

The screenshot shows a web browser window with the title "Notification for 0 Rod Audio & Web CNF - Meeting". The interface includes a top menu bar with options like File, Meeting, Insert, Format Text, Review, and TC. Below the menu is a toolbar with icons for Actions, Show, Skype Meeting, Teams Meeting, Meeting Notes, Attendees, Options, Tags, Collaboration, Meeting, Add to UNIVERGE BLUE, TC Conversation, UNIVERGE BLUE TC, Meeting Notes, OneNote, and View Templates. The main content area displays a meeting invitation form with the following details:

- To: gjohnson@univergecloud.net
- Subject: Notification for 0 Rod Audio & Web CNF
- Location: Web: <https://3cnmc9.univergecloud.net/join/2475> Tel: +1(214)262-9440 or 2640,2475#
- Start time: Wed 9/11/2019 6:57 AM
- End time: Wed 9/11/2019 7:57 AM

Below the form, the text reads: "0 Rod Audio & Web CNF". It then provides instructions: "To join the audio conference, dial (214)262-9440 or 2640, then enter access code 2475#". For the web conference, it says: "To join the web conference, visit <https://3cnmc9.univergecloud.net/join/2475>". At the bottom, it says "In Shared Folder" and "Calendar".

NEC MEETING CENTER COLLABORATION

GET THE **WORD** OUT

When an emergency happens or when an announcement needs to go out about a situation or event, you need a quick and reliable method to send notifications out. It needs to be simple to use, have the ability to communicate via different channels and be a system that can be accessed from anywhere.

MASS NOTIFICATION
EXTEND YOUR REACH

NMC Mass Notification ensures that your message gets out. Whether you need to alert people about an emergency or inform them about some other type of event, this web-based application is simple to use and allows you to send multi-modal messages to individuals or groups – quickly and efficiently.

- > Select communications medium to be used for message delivery (Voice, Email, and SMS or a combination)
- > Send out emergency alerts, organization information, reminders, special event notices, etc...
- > Use built-in 'Find-You' capability to increase the probability of message delivery
- > Send messages on-the-fly or at scheduled times
- > Send pre-recorded messages or record and distribute immediately
- > Send caller-ID of your choice that can be used by cell phones to display associated 'caller name' (e.g., 'Security Alert') - leading to higher percentage of people picking up a message
- > Control the speed of dialing out
- > Display real-time call activity and a progress bar on a Web Portal
- > Abandon Group Alert in progress via web portal or DTMF
- > Provide summary and detailed reports on call completions (Busy, No Answer, Answering machine etc.)

FEATURE	HOW IT WORKS	BENEFITS
Audio Conferencing		
Ad-hoc 'Meet Me' Audio Conference	Moderator and participants agree upon a start time and PIN to use. When people dial in and enter their PIN, they are placed into the conference.	Simple to use. PINs are always active and parties can join the bridge at any time.
Scheduled 'Meet Me' with PIN Audio Conference	Schedule conference call using web portal. Use iCAL to send email notifications via Microsoft Outlook, Lotus Notes, etc...	Ability to use your existing Outlook 'contacts'. Calendar will automatically remind participants about upcoming conference.
Dialed Number (DNIS)-Based Audio Conference	Multiple participants simply dial a phone number to join an audio conference.	No PINs to remember and simple to use. Utilizes NMC Service Selection rules that can be easily defined.
Progressive Dial Out Audio Conference	Moderator can dial out from the conference bridge and bring participants into a conference one by one.	Allows for impromptu conferencing - no need to inform participants ahead of time.
Conference Record and Playback	Set up your conference room with recording turned on. All calls will then be recorded in that room. You can also turn recording on/off via DTMF or Web controls.	Record entire conference or relevant excerpts. Use your PC's media player for playback or dial into the bridge and playback via IVR.
Monitor Audio Conference	Create a Moderator with 'monitor' privilege. This Moderator can then listen/control an ongoing conference unobtrusively.	Useful for diagnosing audio issues with a conference. Requires Incident Management add-in option.
Dial-Out Firebar Conferencing		
Instantaneous Dial Out with "Find-Me" Conference	Use an incoming phone call to trigger a dial out conference. Bridge will call participants at their multiple locations and connect them into a conference. Incoming number can be speed dialed.	Communicate with a 'group' with a single key press. Utilizes NMC Service Selection rules to automatically trigger the dial-out conference based upon incoming Caller ID or based on called number.
Recurring Scheduled Dial Out with "Find-Me" Conference	At a scheduled time, bridge will trigger a dial out to a group of people and upon off-hook, place them into a conference.	Reduces effort required to set up recurring conferences.

* The use of monitoring, recording or listening devices to eavesdrop, monitor, retrieve or record phone conversations or other sound activities, whether or not contemporaneous with transmission, may be illegal in certain circumstances under federal or state laws. Legal advice should be sought prior to implementing any practice that monitors or records any phone conversation. Some federal and state laws require some form of notification to all parties to a phone conversation, such as using a beep tone or other notification methods or requiring the consent of all parties to the phone conversation, prior to monitoring or recording the phone conversation. Some of these laws incorporate strict penalties.

FEATURE	HOW IT WORKS	BENEFITS
Web Collaboration		
Desktop Sharing	Moderator shares his/her Desktop with fellow participants.	Show any document or co-browse the Web with fellow participants. Simple to use and ideal for product demos.
White-Boarding	Create diagrams/visuals with fellow participants in a collaborative session or upload images that can be annotated by all	Ideal for brainstorming or reviewing specific images and highlighting points of interest. Once an image has been annotated or just a plain whiteboard has been created, it can be downloaded as an image to your local PC.
Public & Private Chat Room	Moderator can respond to questions publicly or privately.	Makes Web conferencing more productive.
Record the Meeting	Entire meeting including screen sharing, video and audio can be recorded.	Users can download MP4 file with recording to sharing with others who were not able to attend.
Multiple Presenters	Moderator can allow another participant to take control and share his/her desktop.	Multiple points of view on one conference.
Mass Notification		
Pre-Recorded Message Delivery	Pro-actively build call out groups and pre-record messages, and then tie groups and messages into Group Alert sessions. Ability to trigger dial out from Web Portal or with incoming phone call.	Make messaging a planned activity. No need to search for address books at the time of actual need.
On-the-Fly Message Delivery	Dial into the server, enter a PIN, record/re-record a message and send.	Quick dissemination of emergency oriented messages.
Built-in 'Find-You' Capability	System captures up to four phone numbers per individual and dials them successively until making a positive contact.	Increases probability of delivering a message.
Announcement Box Capability	Moderator periodically dials in and records a message in an announcement box. People can call in and hear the updated message.	Great way to inform people during changing emergency situations such as hurricanes, blackouts etc.
Re-iteratively Contact the Un-Contacted	Set up Group Alert with 'un-contacted' option. Trigger same Group Alert multiple times until message is received by desired percentage of recipients.	No wasted calls. Iteratively build up the percentage of people who received calls.
Send Message to 'Contacted' People	Use 'swap' to convert contacted into un-contacted and send a new message	Only people who received a previous message will get the new message. Great way to send 'all clear' message
